The F6 Extension Stage 1 will remove over 2,000 trucks a day from surface roads; returning local streets to local communities.

To help us with our plans, we need to carry out some geotechnical investigations on Cameron Street, Rockdale from Wednesday 25 September.

We’ll be drilling boreholes in the ground to gather information about the environmental and ground conditions to help us design and build the F6 Extension Stage 1 project.

Our work area is shown on the map over the page.

**Our work schedule**

Work hours are between:

**Monday to Friday, 7am and 6pm**

We expect the work to take around one week to complete, weather permitting.

**How will our work affect you?**

We will help to reduce noise by using low noise reversing alarms on all machinery and turning off equipment and vehicles when they are not being used.

**Traffic changes and pedestrian access**

Our work will impact up to three car parking spaces. This is because we need to install temporary fencing around the work site and store our equipment overnight.

There will be no changes to traffic or pedestrian access during this work. We ask that pedestrians take care when navigating around our work area.
